

Muhrram Ali · Portfolio Visual System

1 · Type

Font family: Inter (Google Fonts)

Heading weight: 600 / 700 · Body weight: 400 / 500

One family only. Clean, technical, highly legible on screen. No second decorative font.

2 · Palette

Role	Hex	Usage
Near-black text	#1A202C	Headings & body text
Near-white background	#F7FAFC	Page background
Accent	#2B6CB0	Links, buttons, focus states
Muted gray	#718096	Captions, secondary labels

Four colors maximum. The work (screenshots, code, numbers) remains the most colorful element on the page.

3 · Logo / Favicon

Simple monogram **MA** set in Inter Bold, white on the accent blue (#2B6CB0), inside a rounded square.

Favicon = the same mark at 32 × 32 px. No extra iconography, no gradients.

Logo mark appears at the top of this page (blue rounded square with white “MA”).

4 · Style note (paste into AI workspace)

Fonts: Inter only (headings 600/700, body 400). Colors: text #1A202C, background #F7FAFC, accent #2B6CB0, muted #718096. Mood: calm, technical, confident. Generous whitespace. The design frames the work and never competes with it. Prefer real screenshots over generated images.

This identity kit is deliberately minimal so that case studies, screenshots, and live demos remain the strongest visual elements on every page.
