

Proof Statement

Muhrram Ali · AI Fluency · Week 1

One-Paragraph Proof Statement

I take machine-learning models from experimentation into working, production-facing pipelines that respect real systems and deployment constraints. I am proving this to a research lead or principal investigator who needs an undergraduate researcher already able to ship end-to-end AI systems, so they will email me to discuss a research opportunity or internship.

Why This Needs to Exist

A CV can list the Cosmic.AI internship, the YOLO pipeline, and the agent wrapper, but it cannot show the actual working systems, the measured accuracy-vs-deployment trade-offs, or the concrete decisions I made; this portfolio is the only place those proofs live.

Claim: taking ML models into production pipelines under real constraints · Audience: research lead / PI · Action: email to discuss opportunity
